Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,7,18 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiu et al (6,624,767).

Shui discloses a method of receiving code symbols corresponding to an interleaved encoded packet, storing the code symbols separately in first, second and third memories (see figs. 3 and 4) and inputting the stored code symbols to the decoder (518) in a mobile communication system, the method comprising the steps of: generating read addresses to read the code symbols according to the size of the

encoder packet; and reading the code symbols at the read addresses from the memories and outputting the read code symbols to the decoder(see col.5, line 64 to col.6, line 9 and figs. 5-7)

Allowable Subject Matter

5. Claims 8-17 and 31-42 are allowed.
